

【BREAKING THE FUTURE】

We hack into the scene,
Know right exactly where we're going
We walk a step ahead
Cuz now we're chasin' serotonin
A virtual access point
No need for tomorrow
Step into the gate
If you think that you can follow

BREAKING THE FUTURE!!!!

Infecting the system
Overwriting permissions
No time to waste
Can you render at our pace?
We're tearing down the walls
And we're changing the scene
Think you got what it takes
To change your future?

Jack me in the world
Open my
Eyes for me
Set me free
There's no turning back
From the dreams of
Fantasy

Wake me from this life
Wire me up
With the soul
Holograms
This code is my power
And my true destiny

come to me

Connections

Displacing

Inside of me

We can take the top as long as we do it together!!

Capture this moment and stand your ground

Nothing can hold you down

We're ready to crash the server

Exceed the apex

Come at me

Faster

Can you be

Stronger

BRING IT!!

Capture this moment and stand your ground

Nothing can hold you down

We'll keep on attacking the mainframe

BREAKING THE FUTURE!!
